UNITED DRIVING SCHOOL

United Driving School has been helping new drivers meet DMV training requirements since 1978. We provide driver education and behind-the-wheel training. These two programs together satisfy both training requirements set by the State of California. The following is a brief description of each part of the training program.

Online Driver Education / This is a self paced study program that meets all DMV requirements for teens studying Driver Education. Any student who successfully completes the online program will be prepared to pass the DMV written test necessary to obtain a permit to drive. In addition to learning the basic rules of the road, students will have the opportunity to explore topics including personal safety on the road, accident prevention, the effects of drinking and driving, the necessity of basic car maintenance and more. The program is a combination of written material, video clips and chapter tests. Enrollment and payment for this program is handled online at our website. Just click on the "Pricing & Registration" button on the left of your screen.

30-hour Driver Education Classroom / This is essentially the same program outlined above except delivered in a classroom setting. The availability of an instructor allows students to ask specific questions and take advantage of classroom discussion. Enrollment and payment for this program is handled over the phone during regular business hours. Ask about availability of this program in your area when you call 800-764-2020.

6-hour Behind-the-Wheel Training / This is a series of 3 private, 2-hour lessons. Our patient, well trained instructors provide careful, comprehensive instruction in an effort to prepare students for the DMV drive test and for a future of safe driving. Student must have a permit before training begins. The DMV requires that students have a behind-the-wheel enrollment certificate before they will be allowed to take the written permit test. Students who did not take our Driver Education class should call our office to enroll in behind-the-wheel training and the required certificate will be mailed to your home address. Payment is due at time of enrollment.

Age Requirements / The following age requirements must be reached before advancing through the licensing process.

- **15½ Years Old /** Students must be at least 15½ years old to take the permit exam. The DMV will require proof of completion from the Driver Education class plus an enrollment certificate for Behind-the-Wheel Training before permit testing.
- **16 Years Old /** Students must be at least 16 years old to take the DMV drive test. Students must hold a driving permit for at least 6 months before taking the drive test. The DMV will require proof of completion for the Behind-the-Wheel training before testing.
- **17½ Years Old /** Students who are at least 17½ are allowed to take a permit test without taking Driver Education. However, these students must be at least 18 before taking the DMV drive test for a license.

Prices / Payment options
